We can write a slide like this. No need for a bracketted structure.

We can create a paragraph with consecutive \n\n. We can create a new line with #newline

We can also change slide configurations for specific slides

We got a different font

Place text where you want

{ What if we have many blocks of text with the same font.
Well we got you covered. }

We can even add images

#h1 We need to think about headers this is syntactic sugar -Bullets -And bullet points --And double bullets ##
